

## P-Quip Wash Pipe System

Changing wash pipes is one of the most dangerous and costly procedures performed on a drilling rig. To minimize these risks, Forum's P-Quip® wash pipe system is designed with the safety of your crew in mind. By making wash pipe and packing changes possible within just a few minutes, the normal downtime for wash pipe change-outs – and the need for hammering – is virtually eliminated.

The innovative P-Quip wash pipe system has been field-tested around the world including the United States (land and offshore), North Sea offshore, etc. With proven success in providing longer life in high-pressure, high-temperature environments, it also helps prevent premature wash pipe failures that can increase non-productive drilling time.

### BENEFITS

- Decreased downtime with easy installation, change-outs completed in minutes
- Inherently safer, no hammers needed to tighten/loosen nuts
- Improved drilling efficiency and equipment life with hard-surface wash pipe

### FEATURES

- Easy operation with built-in air cylinder that fully energizes packing
- Fully rig serviceable, clear operating instructions
- Handles for safer working

### Headquarters:

Forum Energy Technologies, Inc.  
10344 Sam Houston Park Drive, Suite 300  
Houston, TX 77064
